Attention: Mr. Michael Johnston

Gentlemen:

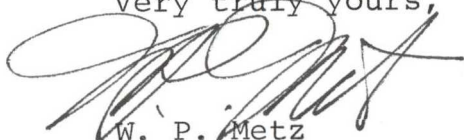

SUBJECT: PRUDHOE BAY AMBIENT AIR MONITORING PROGRAM:
OPERATIONS AND QUALITY ASSURANCE PROCEDURES

Under separate cover you will receive two (2) complete sets of the PRUDHOE BAY OPERATIONS AND QUALITY ASSURANCE MANUAL for the Prudhoe Bay Ambient Air Monitoring Program. Each manual consists of five volumes. Volume I (Protocol Document) contains the operating and quality assurance procedures used to conduct the Prudhoe Bay Air Quality Monitoring Program. Volumes II through V are appendix documents and are comprised of operating manuals for each subsystem used in the Prudhoe Bay network.

Please note that these manuals and the Air Monitoring Program do not reflect any discussion of the possible impact of new standards for continuous monitoring of new stationary sources which were proposed by the EPA on October 10, 1975 (44 F.R. 58601).

Should you have questions concerning the content of the manual, please do not hesitate to contact me.

Very truly yours,

W. P. Metz
Sr. Environmental Engineer
